

Fact-Sheet xentral ERP.

Product & Target Group

xentral is a cloud-based open source ERP software that brings together all business data and processes in one place – from e-commerce, warehouse logistics, production and fulfillment to accounting. Clearer and more flexible: With its intuitive user interface, over 1,000 functions and interfaces to all well-known tech tools, individual processes can be digitized and automated step-by-step. This benefits decision-makers from small start-ups to established companies in all industries who are looking for smart tech solutions for efficient daily business.

Mission & Goals

Simple, fast, data-driven: xentral ERP aims to help companies worldwide digitize and scale their business – with a „Lean ERP“ that flexibly grows with your future requirements. As a central business software, it lays the digital foundation for smart decisions and efficient growth.

Lean ERP as a growth lever for all industries: xentral scales businesses.
